

Do you live in the Westside of Atlanta?

If you live in the Westside of Atlanta and have a child, they may be exposed to harmful soil contaminants

Study Goal: We aim to understand, estimate, and lessen children's exposure to soil contaminants in the Westside of Atlanta.

Eligibility:

- Households in the Westside with at least one child between 6 months and 6 years old

What we're looking for:

- Collection of soil/dust samples from each households during scheduled home visits
- Collection of capillary blood, saliva, and urine samples from child during home visits
- Complete a follow-up phone call interview every 3 months (~15 min per phone call) for 1 year

Benefits:

- At least \$40 as an incentive for your time (and \$15 for each additional child enrolled)
- Your child's exposure and household environmental data
- Educational materials about soil contamination and exposure
